Ahmet Alperen GÜNGÖR

ahmetalperengungor@gmail.com | linkedin.com/in/ahmetalperengungor | ahmetalperengungor.github.io/

Education

University of Tübingen – M.Sc, Machine Learning **2025-Present**

- Fully funded by DAAD masters scholarship

Sabancı University – B.Sc, Computer Science & Engineering - Business Analytics Minor **2020-2025**

- GPA: 3.77
- Business Analytics GPA: 4.00
- Exchange student at Twente University Netherlands in 2024 spring term with 4.0 term grade, ranked #1.

Experience

Student Assistant - Scientific Model Discovery **02/2026 – present**

ML in Science Lab & ELLIS Guest Researcher – Tubingen, Germany

- Working on an LLM-based scientific model discovery framework with Prof. Macke at ML in Science Lab, where we provide discovery methods an API to use, evaluate and contribute tasks across domains.
- Designed a decoupled architecture in which the LLM only proposes models while shared & pluggable fitters and metrics fit and evaluate them. We ship 20+ tasks across 8 problem types and 11 domains.
- Attended and presented my poster as first author at Cambridge ELLIS Pml Summer School.

Full Stack Software Engineer **07/2024 – 07/2025**

Beakwise – Istanbul, Turkiye

- Worked part time on the sales portal for a Maltese insurance company using Rust with Actix-Web and Vue.js.
- Maintained codebase while developing new features and requests for enhancing user experience.
- Designed and built Customer Data Platform (CDP), developing API and UI components.

Research Assistant - Astrophysical Data Analysis **10/2023 – 01/2024**

Sabancı PURE – Istanbul, Turkiye

- Worked with Prof. Kalemci on X-ray spectra data analysis using Python and XSPEC on UNIX.
- Near-optimal chi-squared value of 1.4 for MAXIJ1820+070 achieved from NASA's hard-state NICER dataset.

AI Research Intern - BeIntelli **07/2023 – 09/2023**

DAI-Labor der TU Berlin & GT-ARC – Berlin, Germany

- Worked full-time in TU Berlin lab on visual place recognition for localization of autonomous driving project.
- Our goal was to locate the vehicle by RGB camera data and output accurate gps coordinates using Pytorch.
- Achieved SOTA (more than %35 error reduction) for Berlin dataset by combining MixVPR with MLP regressor.

Research Assistant - Early Alzheimer's Diagnosis **03/2023 – 06/2023**

Sabancı PURE – Istanbul, Turkiye

- Worked with Mrs. Turkan on the transfer learning module of Tubitak-1001 project.
- Our goal was to diagnose Alzheimer's in early stages by 3D eye OCT data using a DL based model.
- Researched and tried multiple CNN's (ResNet-InceptionNet-EfficientNet), best accuracy achieved with Med3D.

AI/ML Engineer Intern - Alim Chatbot Software **02/2023 – 04/2023**

SemperTech – Istanbul, Turkiye

- Worked on the natural language processing unit of Tubitak-1001 project.
- Responsible for intent detection and slot filling tasks for the oven and coffee machine using Keras.

Papers (Coursework & Assistantships) & Awards

https://github.com/ahmetalperengungor/Publications

- First author of **LLM-based model discovery** poster**,** during research assistantship with Prof. Macke.
- Co-first author of **Astrophysical Data Analysis,** during research assistantship with Prof. Kalemci within PURE.
- Presented **Localization by Visual Place Recognition** in TU Berlin' Distributed Artificial Intelligence Laboratory.
- Co-first author of **Optical Coherence Tomography Scans and Deep Learning Based Alzheimer's Disease Diagnosis,** during research assistantship with Prof. Türkan within PURE.
- Author of **Reconstruction of Rawls's Arguments in Algorithmic Allocation: A Mathematical Soft Threshold**
- Author of **The Blind Eye of Technology: Ethical Impacts of Generative AI**
- Author of **Yıldızların Yaşamına Kısa Bir Bakış,** a Turkish introductory astrophysical paper on life cycle of stars.

Awards:

- Fully funded DAAD masters scholarship
- %100 Scholarship + Sakıp Sabancı High Success Scholarship in Sabancı University.
- Dean's high honor list in all semesters.
- Ranked 94th, 277th, 299th, 882th in all 4 fields of National University Examination amongst 2.3M participants.
- Won the yearly top performers award of Riot Games' campus ambassador programme 2 years in a row.

Extracurricular & Projects

ACEBOT - Turkish Trading **10/2024 – 06/2026**

- Worked under Prof. Kaya as a group of 4 students for bachelor thesis and built a trading engine from scratch.
- Conducted research on building and optimizing Turkish NLP models for stock data and sentiment analysis from various Turkish news and built an ML model with technical indicators to combine in the strategy module.

Founding Project Member of kAi Artificial Intelligence Club **03/2023 – 10/2024**

- kAi Sabanci is the first-ever student club in Turkey to be selected to NVIDIA's Student Network program.
- Our goal is to provide AI/ML enthusiasts the opportunity to learn, innovate, and create with the support of our sponsors, while building a collaborative community of passionate individuals.
- Presented my knowledge on Deep Learning and Autonomous Driving in multiple seminars in university, aiming to provide insights on this domain and academic research in general.

Riot Games Campus Ambassador & Vice-President of Sabanci University Esports Club **10/2020 – 03/2023**

- Community and team representative for Sabanci University in the Riot Games Ambassador programme.
- Organizing events with sponsorships of major corporations like Intel (UET 2022 Spring & 2023 Fall), Amazon (UEM 2022 Spring) and Redbull (Campus Clutch).

Coursework Related Projects (Related codes and more projects on github**)**

- **OUATIH:** Data analysis for post-covid movie industry using **Python** for Tübingen Data Literacy course
- **CrossQ-SAC:** A continuous control RL agent for Tübingen RL hockey tournament using **SAC**.
- **NoteBridge**: An interactive forum app for musicians using **Java** and **PostgreSQL**
- **Weezart**: A music analysis and recommendation app using **Spotify's API**, Java **Spring** and **MySQL** for Azure
- **DiSUcord**: A client-server messaging network app using **C# websocket**

Skills

Machine Learning (Python, DL, PyTorch, Math for ML)
OOP (C++, Rust, Java, Vue, JS, SQL, Git, UNIX, SLURM)
Team & Time Management
Problem Solving & Critical Thinking

Hobbies

Problem Solving (Puzzles, Sudoku, Chess, Math)
Reading (Voluntary audiobook narration for kids)

Strategy Games (#1 in Turkey and #5 in Europe in TFT) **Piano & Music Theory** (Yale Certificate, Awards)
